Cutting up files & printing tickets

(funky imposition for all)
Imposing tickets for Cut & Stack
The imposition engine to the rescue…
Let’s have a look!
Cutting files up
(and putting them back together again!)
Let’s do this using the imposition engine, right?
Turns out we need some additional help...

1. Create multiple pages (as many as we need to have cut out pieces)
2. Set the trimbox for each of these pages
3. Run the imposition engine to generate the new layout
Let’s have a look!
That's it folks!
